1 [Integrated document and workflow management applied to the offer processing of a machine tool company](#)

Stefan Morschheuser, Heinz Raufer

 August 1995 **Proceedings of conference on Organizational computing systems**

Publisher: ACM Press

Full text available: pdf(1.29 MB)

 Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

Introducing document and workflow management systems causes two main problems: How can the supported business processes be adequately modeled? How can existing information systems and databases be integrated? Within this paper, we present tools, methods and other approaches, which are designed to solve these problems. They are illustrated by the offer processing of a machine tool company. This process starts with a customer ...

2 [Workflow technology: trade-offs for business process re-engineering](#)

Keith D. Swenson, Kent Irwin

 August 1995 **Proceedings of conference on Organizational computing systems**

Publisher: ACM Press

Full text available: pdf(868.25 KB)

 Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

The relationship is examined between Business Process Reengineering (BPR), a significant new management trend across all industries, and Workflow Technology a new and rapidly expanding sector of the software market. Since Workflow is a market driven technology, in order to make a meaningful analysis, we start by presenting the current state of the art in workflow technology, as uncovered by our work within the Workflow Management Coalition. Some aspects of workflow are found to be w ...

3 [Process integration: A unified process for software and documentation development](#)

Michael Priestley, Mary Hunter Utt

 September 2000 **Proceedings of IEEE professional communication society international professional communication conference and Proceedings of the 18th annual ACM international conference on Computer documentation: technology & teamwork**

Publisher: IEEE Educational Activities Department

 Full text available: pdf(878.38 KB) Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#)

This paper proposes integration of the documentation development process into the Rational Unified Process (RUP), a formal development process for software applications. Specifically, the paper identifies (in RUP parlance) the workers in the process (such as technical writer, information architect), the artifacts required by and produced by the documentation process (including concept, task, and reference documentation), and the documentation development workflow (the activities of the workers w ...

4 Automated process support for organizational and personal processes

 Kevin Gary, Tim Lindquist, Harry Koehnemann, Ly Sauer
November 1997 **Proceedings of the international ACM SIGGROUP conference on Supporting group work: the integration challenge**

Publisher: ACM Press

Full text available:  pdf(1.22 MB) Additional Information: [full citation](#), [references](#), [index terms](#)

Keywords: components, personal process, workflow

5 Document analysis 2: Dynamic collaborative business processes within documents

 Thomas B. Hodel, Harald Gall, Klaus R. Dittrich
October 2004 **Proceedings of the 22nd annual international conference on Design of communication: The engineering of quality documentation**

Publisher: ACM Press

Full text available:  pdf(335.58 KB) Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

Effective collaborate business process support is essential in today's business. In this paper, we address this aspect within documents. Often, such text documents are stored unsystematically in a rather confusing file structure with an inscrutable hierarchy and little access control. Business data, on the other hand, are stored in a systematic way in databases allowing multi-user, multi-site, user-/role-specific controlled access. We store text documents in databases and exploit these databa ...

6 Workflow enactment with continuation and future objects

 Dragos A. Manolescu
November 2002 **ACM SIGPLAN Notices , Proceedings of the 17th ACM SIGPLAN conference on Object-oriented programming, systems, languages, and applications OOPSLA '02**, Volume 37 Issue 11

Publisher: ACM Press

Full text available:  pdf(322.59 KB) Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

An increasing number of software developers are turning to workflow to separate the logic and the control aspects in their applications, thus making them more amenable to change. However, in spite of recent efforts to standardize and provide reusable workflow components, many developers build their own. This is a challenging endeavor and involves solving problems which seem incompatible with the object paradigm and current object-oriented programming languages. In the context of an object-orient ...

7 Techniques for document management and document engineering: Document

**digitization lifecycle for complex magazine collection**

Sherif Yacoub, John Burns, Paolo Faraboschi, Daniel Ortega, Jose Abad Peiro, Vinay Saxena
November 2005 **Proceedings of the 2005 ACM symposium on Document engineering
DocEng '05**

Publisher: ACM Press

Full text available: pdf(540.79 KB) Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

The conversion of large collections of documents from paper to digital formats that are suitable for electronic archival is a complex multi-phase process. The creation of good quality images from paper documents is just one phase. To extract relevant information that they contain, with an accuracy that fits the purpose of target applications, an automated document analysis system and a manual verification/review process are needed. The automated system needs to perform a variety of analysis and ...

Keywords: document analysis and understanding, document digitization, document engineering, preservation of historical content

8

Lineage retrieval for scientific data processing: a survey

Rajendra Bose, James Frew

March 2005 **ACM Computing Surveys (CSUR)**, Volume 37 Issue 1

Publisher: ACM Press

Full text available: pdf(728.75 KB) Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

Scientific research relies as much on the dissemination and exchange of data sets as on the publication of conclusions. Accurately tracking the lineage (origin and subsequent processing history) of scientific data sets is thus imperative for the complete documentation of scientific work. Researchers are effectively prevented from determining, preserving, or providing the lineage of the computational data products they use and create, however, because of the lack of a definitive model for lineage ...

Keywords: Data lineage, audit, data provenance, scientific data, scientific workflow

9

Getting some perspective: using process descriptions to index document history

Paul Dourish, Richard Bentley, Rachel Jones, Allan MacLean

November 1999 **Proceedings of the international ACM SIGGROUP conference on Supporting group work**

Publisher: ACM Press

Full text available: pdf(1.53 MB) Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

Process descriptions are used in workflow and related systems to describe the flow of work and organisational responsibility in business processes, and to aid in coordination. However, the division of a working process into a sequence of steps provides only a partial view of the work involved. In many cases, the performance of individual tasks in a larger process may depend on interpretations and understandings of how other aspects of the work were conducted. We p ...

10

Workflow redesign through consolidation in information-intensive business processes

Rajiv Dewan, Abraham Seidmann, Zhiping Walter

December 1997 **Proceedings of the eighteenth international conference on Information systems**

Publisher: Association for Information Systems

Full text available:  [pdf\(104.95 KB\)](#) Additional Information: [full citation](#), [references](#), [citations](#)

Keywords: business process reengineering, document management, electronic documents, job design, work flow

11 Coordination models, languages and applications (CM): Orchestrating document-based workflows with X-Folders

Davide Rossi

March 2004 **Proceedings of the 2004 ACM symposium on Applied computing**

Publisher: ACM Press

Full text available:  [pdf\(198.06 KB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#)

This paper introduces X-Folders: a software environment for multi-party document-based processes that aims at supporting the implementation of workflow processes involving multiple users that interact by means of documents stored in special, reactive, folders. When the documents inside a folder reach a given state a task is triggered, tasks orchestrate a set of web services in order to enact the workflow. X-Folders is based on a model that promotes the implementation of applications distributed ...

Keywords: CSCW, coordination, orchestration, peer-to-peer, workflows

12 Workflow management systems for financial services

Thomas Schael, Buni Zeller

December 1993 **Proceedings of the conference on Organizational computing systems**

Publisher: ACM Press

Keywords: business process automation, computer supported cooperative work, customer satisfaction, groupware, office automation, office procedure, process reengineering, workflow management technology, workgroup computing

13 Process and workflow management: Introducing eservices in business process models

Lerina Aversano, Gerardo Canfora

July 2002 **Proceedings of the 14th international conference on Software engineering and knowledge engineering SEKE '02**

Publisher: ACM Press

Full text available:  [pdf\(249.37 KB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

The need for automatic support of business processes that extend over the boundaries of an enterprise is a recognized need of emerging virtual organizations. To make workflow technologies useful during the enactment of business processes involving many partners that reciprocally provide and consume services, it is important to provide a model, and supporting technologies, to manage the introduction of services in workflow models. This paper introduces a framework for the introduction of eServices ...

Keywords: eservices, process models, workflow management

14 Integrated process management: from planning to work execution

Ali Bahrami

March 2005 **Proceedings of the IEEE EEE05 international workshop on Business services networks BSN '05****Publisher:** IEEE PressFull text available:  pdf(312.76 KB) Additional Information: [full citation](#), [abstract](#), [references](#)

Project management tools are used to manage projects from time as well as from resource leveling perspectives. Workflow management systems guide users through processes by driving the processes based on formal process definitions also called workflow types. This paper describes integrated process management system that will integrate project management, business process modeling, simulation and workflow technologies in order to support scheduled workflow execution. The target will be achieved by ...

15 How can cooperative work tools support dynamic group process? bridging the specificity frontier

Abraham Bernstein

December 2000 **Proceedings of the 2000 ACM conference on Computer supported cooperative work****Publisher:** ACM PressFull text available:  pdf(200.96 KB) Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

In the past, most collaboration support systems have focused on either automating fixed work processes or simply supporting communication in ad-hoc processes. This results in systems that are usually inflexible and difficult to change or that provide no specific support to help users decide what to do next.

This paper describes a new kind of tool that bridges the gap between these two approaches by flexibly supporting processes at many points along the spectrum: from highly specified ...

Keywords: dynamic/improvisational change, mixed-initiative systems, process specificity, process support system

16 Customizing internal activity behaviour for flexible process enforcement

Belinda M. Carter, Joe Y. C. Lin, Maria E. Orlowska

January 2004 **Proceedings of the fifteenth conference on Australasian database - Volume 27 CRPIT '04****Publisher:** Australian Computer Society, Inc.Full text available:  pdf(129.79 KB) Additional Information: [full citation](#), [abstract](#), [references](#)

Workflow technology has met with success in a variety of industries, although several limitations have emerged. One such drawback is the inflexibility of specification languages, including a lack of support for inter-task dependencies. Expressiveness of the specification language is believed to be a determining factor of workflows applicability and its industrial value as solution for process support. This paper attempts to address this limited language expressiveness by suggesting an alternative ...

17 Engineering e-learning systems (ELS): Carrying on the e-learning process with a workflow management engine

Mirko Cesarini, Mattia Monga, Roberto Tedesco

March 2004 **Proceedings of the 2004 ACM symposium on Applied computing**

Publisher: ACM Press

Full text available:  pdf(209.38 KB) Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

In recent years e-learning systems have promised to change the way people learn. However open issues still remain, in particular actual e-learning environments do not consider learning activities as part of the process of learning. Thus, it is not possible to define structured courses and specify precise learning paths apt to guide learners through learning materials. In our approach, we define courses as workflows. By so doing we can exploit powerful procedural rules in order to define precise ...

18 Live documents with contextual, data-driven information components

Anke Weber, Holger M. Kienle, Hausi A. Müller

October 2002 **Proceedings of the 20th annual international conference on Computer documentation**

Publisher: ACM Press

Full text available:  pdf(627.10 KB) Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

We introduce the notion of a live document and we describe our concept of live documents with contextual, data driven information components. The dynamic and interactive features of live documents provide a consistent data source for multimedia presentations targeted to various audiences and multiple platforms. Therefore, they contribute to the solution of key challenges in single sourcing and repurposing. We motivate the use of live documents with sample scenarios from the field of systems docu ...

Keywords: Microsoft Office, live documents, repurposing, reverse engineering, scalable vector graphics, single sourcing, software engineering, systems documentation

19 Session 3: An architecture for the interoperability of workflow models

Hamri Salah, Boufaida Mahmoud, Boudjlida Nacer

November 2005 **Proceedings of the first international workshop on Interoperability of heterogeneous information systems IHIS '05**

Publisher: ACM Press

Full text available:  pdf(223.51 KB) Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

The goal of this work is to contribute to the field of interoperability of Workflow models. To achieve interoperability, we have built a generic architecture that addresses three levels of abstraction: a common meta-model that the Workflow models must share, a common model that they enact collectively, and a common data model whose management is shared. So, the approach we have adopted is based on a strategy of uniformity to solve the problems related to the semantic, syntactic and execution pla ...

20 KM-4 (knowledge management): distributed knowledge management: Towards smarter documents

Vikas Krishna, Prasad M. Deshpande, Savitha Srinivasan

November 2004 **Proceedings of the thirteenth ACM international conference on Information and knowledge management CIKM '04**

Publisher: ACM Press

Full text available:  pdf(224.70 KB) Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

Document analysis research typically focuses on document image understanding or classic problems in text classification, clustering, summarization and discovery. While that is an important aspect of document management, in practice, documents lifecycles are often determined by the context of the business process that they are relevant to. It therefore becomes necessary for the document analysis techniques to recognize and leverage the contextual information provided by a supporting schema and ...
